The Pathway towards Laser Safety

- Maintain instrument: coolant, power, etc.
- Keep eyes out of the plane of the laser beam.
- Don’t contaminate the instrument.
- No unprotected beams through walkways.
- Keep food and drink out of the lab.
- Keep beams parallel to the table and in one plane.
- No jewelry, watches, or loose long hair.
- Proper eye protection for current wave-length.
- Do not defeat interlocks without permission from the PI or instructor.
